

# InsightCyber Managed IoT Security™

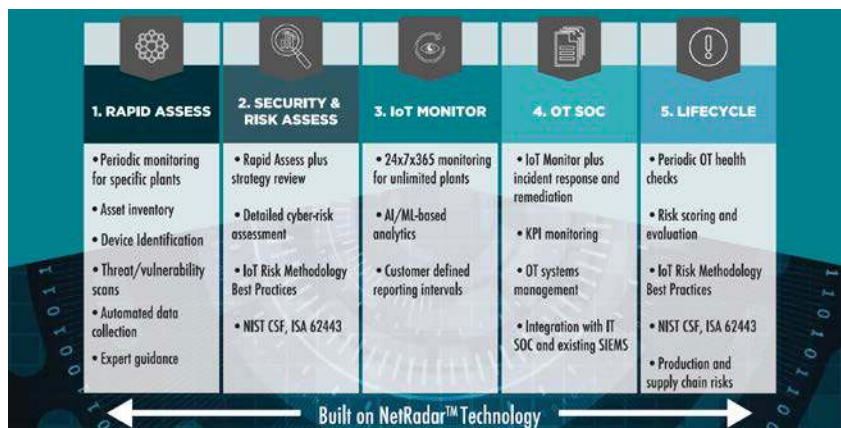

*InsightCyber services support the full spectrum of ICS/OT/IOT maturity, from early-stage IOT adoption, health checks and strategy validation to full-lifecycle risk management.*

## The InsightCyber Service Portfolio

The InsightCyber portfolio of Managed IOT Security Services, based on the NetRadar™ visibility and analytics platform, includes the following modules:

- InsightCyber Rapid Assess™, an entry-level service that provides periodic asset inventory and threat scans for specific plants. Rapid Assess takes information from NetRadar and using our customizable machine-learning and analytics platform, Rapid Assess provides reports describing a maturity rating and recommended security posture.
- InsightCyber Security & Risk Assess™, which provides a detailed cyber-risk assessment based on InsightCyber's best practices-based ICS/OT risk methodology.
- InsightCyber IoT Monitor™, which provides 24x7x365 visibility and threat monitoring for an unlimited number of plants.
- InsightCyber OT SOC™, which extends IoT Monitor with incident response, KPI monitoring and remediation capabilities.
- InsightCyber Lifecycle™, which extends OT SOC with periodic OT health checks and risk scoring based on standard frameworks.

Delivered via subscription, each managed service includes configurable dashboards for enterprise professionals in executive management, risk management, compliance and audit, technology and security and plant operations.

The InsightCyber technology stack incorporates best of breed, best practices and proven models, integrated with event correlations, risk scoring and continuous monitoring. We use patent-pending artificial-intelligence technology for cost-effective and manageable operations at global scale. For security operations teams, InsightCyber services deliver customer-specific contexted and actionable event streams. For OT teams, they provide improved operational efficiencies.

## About InsightCyber

Insight Cyber Group, Inc. provides a suite of advanced managed IoT security services through MSSPs and other partners. Our services deliver continuous, real-time monitoring, visibility, cyber-risk management and improved operational efficiencies for ICS/OT/IOT assets and cyber-physical systems.
